**MEMORANDUM TO THE SENIOR ASSOCIATE DEPUTY MINISTER
AND CHIEF OPERATING OFFICER**

**DEMANDE DE PRÉ-APPROBATION D'ÉVÈNEMENT POUR LA
CONFÉRENCE DU MONDE D'ANALYTIQUES PRÉDICTIVE /
EVENT PRE-APPROVAL REQUEST FOR PREDICTIVE ANALYTICS WORLD,
WASHINGTON, DC, SEPTEMBER 22-27, 2019**

(FOR DECISION)

SUMMARY

- The purpose of this note is to seek your approval for one participant from the Integrity Business Analytics team to attend the Predictive Analytics World in Washington, DC, USA, September 22-27, 2019.
- This conference focuses on predictive analytics, fraud analytics and anomaly detection. It offers a unique perspective and is not available in Canada at this time. This conference, which is geared specifically to governments, allows us to meet with participants from various US government agencies and other countries.
- It should be noted that in the past CRA and CIC have sent representatives. In addition to the conference, the participant is planning to meet with the analytics team at the Social Security Administration in Washington. This would build off earlier discussions on the fraud analytics techniques they are using to learn from their experience and share Canadian's best practices. Lastly, this conference includes experts from around the world with over 40 speakers and 30 different sessions along with 2 intensive workshops on predictive analytics and fraud analytics, and anomaly detection, which brings value to the conference to gain extensive learning.
- Chris Muldowney, Director of the Business Analytics team would attend this conference with an estimated cost of \$5,294.30. The expenditure details are reflected in the "Expense Travel Report" form (Annex A).
- Participation will increase the department's ability to develop, test, and apply predictive analytics and data-driven solutions to programs for integrity purposes, and provide insight into emerging methodologies or techniques that can identify risk, manage integrity resources effectively, and strengthen existing practices.
- Your approval is required to initiate travel booking. I confirm that the proposed expenditures provide value for money and the most economical options have been selected.

Note: Until event approval has been given by the appropriate delegated authority, no components of the events will be initiated or procured that would result in the establishment of a liability for the department (i.e. travel, hospitality, room or equipment rentals, etc).

Travel Plan
Plan des voyages

Activity Title / Titre de l'activité : Predictive Analytics World

Branch / Direction générale : Integrity Services Branch

Categorie of travel / Catégorie de voyage : 2. KEY STAKEHOLDERS - Travel necessary to engage key stakeholders in relation to such matters as policy, program or regulatory development or renewal.
PRINCIPAUX INTERVENANTS - Les voyages nécessaires afin de mobiliser les principaux intervenants relativement à des questions comme la politique, l'élaboration ou le renouvellement de programmes ou de règlements.

Travel Objective / Objectif des voyages : This conference focuses on predictive analytics, fraud analytics and anomaly detection and offers a unique perspective and it is not available in Canada at this time. This conference, which is geared specifically to governments, allows us to meeting with participants from various US government agencies and other countries and it should be note that in the past CRA and CIC have sent representatives. In addition to the conference, we would like to use this trip to meet with the SSA in Washington on analytics techniques. Lastly, this conference includes experts from around the world with over 40 speakers and 30 different sessions along with 2 intensive workshops on predictive analytics and fraud analytics, and anomaly detection. The purpose of attending this conference is to share and discuss emerging trends and best practices of how government agencies are currently using data analytics to enhance mission outcomes. This conference all features a daylong workshop on fraud analytics and Anomaly Detection. Dramatically reducing fraud and other abuse is a challenging task that ISB is attempting to undertake with comprehensive and flexible analytics solutions. This workshop will assist ISB to develop a wide spectrum of fraud analytics capabilities as it discusses a range of issues from basic rules and reporting to complex network graph analysis - this workshop will show us how to build out all the components of a holistic and robust fraud analytics platform. It will review critical technical details as well as problems to watch out for based on lessons learned over years of consulting on real-world fraud cases. This session teaches best practices for fraud analytics constrained by the realities of incomplete data and unrecognized or emerging fraud patterns. Existing fraud models have proven value, but nagging concerns remain about "unknown unknowns". A new view of the problem is required.

Rationale for transportation / Raison pour le transport : Every attempt will be made to secure the cheapest flight available, using services like Uber or Lyft to cut taxi costs

Rationale for accommodations / Raison pour le logement : Every effort will be made to stay in a government approved hotel with government negotiated rates

Rationale for excluded Meals / Raison pour l'exclusion de repas : N/A

Rationale for Other costs / Raison pour les autres coûts : N/A

Rationale why virtual presence or other remote meeting solutions were not applied / Raison pour laquelle la présence virtuelle ou une autre solution de réunion à distance n'a pu être appliquée : Virtual session are not provided for this conference

* Provide a description in the appropriate rationale above. / Fournir une description dans la raison appropriée ci-dessus.
** For Public Servant only / Pour fonctionnaires seulement

I certify that travel, hospitality, conferences and event expenditures are managed with prudence and probity and represent the most economic and efficient use of funds given the nature of the activity in relation to the achievement of our department's objectives.
Je certifie que les dépenses de voyages, d'accueil, de conférences et d'événements sont gérées avec prudence et probité, et elles représentent la façon la plus économique et la plus efficace d'utiliser les fonds publics, compte tenu de la nature de l'activité par rapport à la réalisation des objectifs de notre ministère.
